Air Handlers with Optional Hydronic Heating Coils

The Advantage of our Air Handler System

The Thermo Pride air handlers are designed to be used as a stand-alone cooling, stand-alone heating or combination heating and cooling air handlers. The air handlers can be installed in an upflow or horizontal application. The cooling coil comes factory installed. In heating mode, our air handler provides up to 70° temperature rise (at 180°F entering water temperature), which provides warmer air than many air handlers on the market. All units operate on 115V and coils use 410A refrigerant.

Our air handler requires little maintenance and provides efficiency, longevity, and worry-free comfort. It also comes with our standard 10-year coil and 5-year parts warranty.
