## Modulating, Spring Return, $24 \mathrm{~V}, 0$ to $135 \Omega$ Input

5-year warranty

Technical data

| Electrical data | Nominal voltage | AC/DC 24 V |
| :---: | :---: | :---: |
|  | Nominal voltage frequency | 50/60 Hz |
|  | Power consumption in operation | 7.5 W |
|  | Power consumption in rest position | 3 W |
|  | Transformer sizing | 10 VA (class 2 power source) |
|  | Electrical Connection | 18 GA plenum cable, $3 \mathrm{ft}[1 \mathrm{~m}]$, with $1 / 2^{\text {" conduit }}$ connector |
|  | Overload Protection | electronic throughout 0... $95^{\circ}$ rotation |
|  | Electrical Protection | actuators are double insulated |
| Functional data | Torque motor | $180 \mathrm{in}-\mathrm{lb}$ [20 Nm] |
|  | Operating range Y | 0... $135 \Omega$ |
|  | Operating range Y note | Honeywell Electronic Series 90 , input $0 . .135 \Omega$ |
|  | Position feedback U | 2...10 V |
|  | Position Feedback | 2... 10 V, Max. $0.5 \mathrm{~mA}, \mathrm{VDC}$ variable |
|  | Position feedback U note | Max. 0.5 mA |
|  | Position feedback U variable | VDC variable |
|  | Direction of motion motor | selectable with switch 0/1 |
|  | Direction of motion fail-safe | reversible with $\mathrm{cw} / \mathrm{ccw}$ mounting |
|  | Manual override | 5 mm hex crank (3/16" Allen), supplied |
|  | Angle of rotation | $95^{\circ}$, adjustable with mechanical end stop, 35...95 |
|  | Angle of rotation note | adjustable with mechanical end stop, 35...95 ${ }^{\circ}$ |
|  | Running Time (Motor) | default 150 s , variable $70 . . .220 \mathrm{~s}$ |
|  | Running time motor variable | $70 . .220 \mathrm{~s}$ |
|  | Running time fail-safe | $<20 \mathrm{stamb}=68^{\circ} \mathrm{F}\left[20^{\circ} \mathrm{C}\right]$ |
|  | Running time fail-safe note | tamb $=68^{\circ} \mathrm{F}\left[20^{\circ} \mathrm{C}\right]$ |
|  | Angle of rotation adaptation | off (default) |
|  | Override control | MIN (minimum position) $=0 \%$ |
|  |  | MID (intermediate position) $=50 \%$ |
|  |  | $\operatorname{MAX}$ (maximum position) $=100 \%$ |
|  | Noise level, motor | 40 dB (A) |
|  | Noise level, fail-safe | $62 \mathrm{~dB}(\mathrm{~A})$ |
|  | Shaft Diameter | $1 / 2 . . .1 .05$ " round, centers on $1 / 2^{\prime \prime}$ and $3 / 4^{"}$ with insert, 1.05 " without insert |
|  | Position indication | Mechanical |
| Safety data | Degree of protection IEC/EN | IP54 |
|  | Degree of protection NEMA/UL | NEMA 2 |
|  | Enclosure | UL Enclosure Type 2 |
|  | Agency Listing | cULus acc. to UL60730-1A/-2-14, CAN/CSA <br> E60730-1:02, CE acc. to 2014/30/EU and 2014/35/ |

|  |  | EU; Listed to UL 2043 - suitable for use in air plenums per Section 300.22(c) of the NEC and Section 602.2 of the IMC |
| :---: | :---: | :---: |
|  | Quality Standard | ISO 9001 |
|  | Ambient temperature | $-22 . . .122^{\circ} \mathrm{F}\left[-30 . . .50^{\circ} \mathrm{C}\right]$ |
|  | Storage temperature | $-40 . .176^{\circ} \mathrm{F}\left[-40 . . .80^{\circ} \mathrm{C}\right]$ |
|  | Ambient humidity | max. 95\% r.H., non-condensing |
|  | Servicing | maintenance-free |
| Weight | Weight | 4.1 lb [1.9 kg] |
| Materials | Housing material | Galvanized steel and plastic housing |

Default/Configuration
Default parameters for 0 to $135 \Omega$ input applications of the AF..-MFT95 actuator are assigned during manufacturing. If required, custom versions of the actuator can be ordered, however the control input cannot be modified via MFT PC tool software. The other parameters are variable and can be changed by three means: Factory pre-set or custom configuration, set by the customer using PC-Tool software or the handheld ZTH US.

Application For fail-safe, modulating control of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer's specifications. A feedback signal is provided for position indication for master-slave applications. Two AF's can be piggybacked for torque loads of up to $360 \mathrm{in}-\mathrm{lbs}$. Minimum 3/4" diameter shaft. OR Maximum of three AF's can be piggybacked for torque loads of up to 432 in-lbs. Minimum 3/4" diameter shaft. Master-Slave wiring for either configuration.

Operation The AF..24-MFT95 actuator provides $95^{\circ}$ of rotation and is provided with a graduated position indicator showing $0^{\circ}$ to $95^{\circ}$. The actuator will synchronize the $0^{\circ}$ mechanical stop or the physical damper or valve mechanical stop and use this point for its zero position during normal control operations. A unique manual override allows the setting of any actuator position within its $95^{\circ}$ of rotation with no power applied. This mechanism can be released physically by the use of a crank supplied with the actuator. When power is applied the manual override is released and the actuator drives toward the fail-safe position. The actuator uses a brushless DC motor which is controlled by an Application Specific Integrated Circuit (ASIC) and a microprocessor. The microprocessor provides the intelligence to the ASIC to provide a constant rotation rate and to know the actuator's exact position. The ASIC monitors and controls the brushless DC motor's rotation and provides a Digital Rotation Sensing (DRS) function to prevent damage to the actuator in a stall condition. The position feedback signal is generated without the need for mechanical feedback potentiometers using DRS. The actuator may be stalled anywhere in its normal rotation without the need of mechanical end switches. The AF..24-MFT95 is mounted directly to control shafts up to 1.05 " diameter by means of its universal clamp and anti-rotation bracket. A crank arm and several mounting brackets are available for damper applications where the actuator cannot be direct coupled to the damper shaft. The spring return system provides minimum specified torque to the application during a power interruption. The AF..24-MFT95 actuator is shipped at $5^{\circ}$ ( $5^{\circ}$ from full fail-safe) to provide automatic compression against damper gaskets for tight shut-off.

Typical specification Spring return control damper actuators shall be direct coupled type which require no crank arm and linkage and be capable of direct mounting to a jackshaft up to a $1.05^{\prime \prime}$ diameter. The actuator must provide modulating damper control in response to a 0 to 135 ohm control input from a Honeywell Series 90 controller or equivalent. The actuators must be designed so that they may be used for either clockwise or counter clockwise fail-safe operation. Actuators shall use a brushless DC motor controlled by a microprocessor and be protected from overload at all angles of rotation. Run time shall be constant, and independent of torque. A 2 to 10 VDC feedback signal shall be provided for position feedback or master slave applications. Actuators shall be cULus listed and have a 5 year warranty, and be manufactured under ISO 9001 International Quality Control Standards. Actuators shall be as manufactured by Belimo.

Factory settings Default parameters for 0 to $135 \Omega$ input applications of the AF..-MFT95 actuator are assigned during manufacturing. If required, custom versions of the actuator can be ordered, however the control input cannot be modified via MFT PC tool software. The other parameters are variable and can be changed by three means: Factory pre-set or custom configuration, set by the customer using PC-Tool software or the handheld ZTH US.

| Electrical accessories | Description | Type |
| :---: | :---: | :---: |
|  | Belimo PC-Tool, Software for adjustments and diagnostics | MFT-P |
|  | Auxiliary switch, mercury-free | P475 |

|  | Explosion Proof Housing $16 \times 10 \times 6.435$ " [406x254x164 mm] (LxWxH), UL and CSA, Class I, Zone 1\&2, Groups B, C, D, (NEMA 7), Class III, Hazardous (classified) | ZS-260 |
|  | Locations, outdoor application NEMA 4 |  |
|  | Weather shield $17-1 / 4 \times 8-3 / 4 \times 5-1 / 2$ " $[438 \times 222 \times 140 \mathrm{~mm}](\mathrm{LxW} \times H)$, NEMA 4 X , with mounting brackets | ZS-300 |
|  | Weather shield $17-1 / 4 \times 8-3 / 4 \times 5-1 / 2^{\prime \prime}[438 \times 222 \times 140 \mathrm{~mm}](L x W x H)$, NEMA $4 X$, with mounting brackets | ZS-300-5 |
|  | Shaft extension 1/2" | ZS-300-C1 |
|  | Shaft extension 3/4" | ZS-300-C2 |
|  | Shaft extension ${ }^{\prime \prime}$ | ZS-300-C3 |

Electrical installation

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

Meets cULus requirements without the need of an electrical ground connection.
$\triangle$ Provide overload protection and disconnect as required.
(3) Actuators may also be powered by 24 VDC.

Actuators and controller must have separate transformers.
Consult controller instruction data for more detailed information.
Resistor value depends on the type of controller and the number of actuators. No resistor is used for one actuator. Honeywell® resistor kits may also be used.
25 To reverse control rotation, use the reversing switch.
46 Actuators may be controlled in parallel. Current draw and input impedance must be observed.

Typical and Override Control

Series 90 low limit control-280 W

$$
\triangle 29
$$

High Limit Control

Multiple Actuators with Minimum Position Potentiometer

Low Limit Control

Multiple Actuators

Multiple Actuators Used with W973, W7100 and T775
