

Thermostat Guards

Versaguard™ Universal Thermostat Guards . . . to protect any Commercial Thermostat

Honeywell Versaguard Universal Thermostat Guards are designed to cover a wide variety of thermostats. Choose clear plastic covers to allow display of temperature and settings, or opaque covers to completely hide the unit.

One tough guard . . .

Bend it, twist it, smack it or otherwise abuse a Honeywell Versaguard Universal Thermostat Guard and it just keeps on protecting the thermostat inside. These tough guards are designed to prevent individuals from “fiddling” with temperature settings and prevent thermostat damage in high impact areas. All exceed specifications for the Underwriters Laboratories Inc. “pry test” (UL873 54.1B), which requires that the guard remain closed upon a direct pull of 14 pounds in an attempt to pry off the cover. And all guards and their contents handily survive the UL87354.1C impact test, where a 2-in. diameter steel ball is dropped on the cover applying a minimum 1 foot-pound force.

TG509; TG510; TG511; TG512 Versaguard Universal Thermostat Guards

Enclose and protect wall thermostats against tampering, damage and unauthorized adjustment of thermostat settings.

- Unique double-wall construction provides extra measure of tamper-resistance.
- Available in three sizes—small, medium and large—to fit almost all thermostats.
- Used in both new and existing applications.
- Constructed of opaque polystyrene, clear acrylic, or beige painted steel.
- Include opaque polystyrene wallplate, ring base, guard cover, tumbler lock, two keys and optional Honeywell logo insert.
- Tamper-resistant lock; key cannot be removed without being in locked position.
- All models mount vertically or horizontally on wall or exposed junction box.
- Vents in guard base allow airflow for optimum thermostat performance.

^b Cover has a hole for access to up/down buttons on thermostat.

TG504 Key Lock® Covers for T874 Thermostats

TG504A1033

TG504A1025

Protect T874 thermostats and Q674 subbases, and Y594 thermostat/ subbase packages against damage and hinder tampering with thermostat settings and subbase switches.

- Easy-to-install Key Lock cover replaces thermostat cover without removal or adjustment of thermostat.
- No screws or mounting accessories are required.
- Ideal for office areas, lobbies, stores, restaurants, clinics and other areas where protection of T874/Q674 is needed.

- Rugged molded plastic cover allows good airflow for proper system performance.
- Y594D1354 Pack available.

Includes:

- T874D2031 Multistage Thermostat (same as T874D1165 less cover)
- Q674E1049 Switching Subbase
- TG504A1025 Custom Key Lock Cover

This is a convenient, all-in-one package for new or replacement installations. The Custom Key Lock cover, replacing the standard T874 cover, protects against tampering and vandalism.

TEMPERATURE RATINGS:

Operating Range: 55 F to 95 F (13 C to 35 C).

DIMENSIONS, APPROXIMATE: 4-7/16 in. (113 mm) high, 6-1/16 in. (154 mm) wide, 2-1/8 in. (113 mm) deep.

REPLACEMENT PARTS:

- 195980A Keys (2) for Key Lock cover.
- 4074EDS Key and Clear Lens.
