

QUIET-ONE 2000 Kickspace Heaters

ACCESSORIES

EFFECTIVE DECEMBER 1, 2004

QFHK-8 The Quick Fit Hose Kit

The concept behind this accessory was that a homeowner who has spent a lot of money on kitchen or bathroom cabinets just doesn't want an installer cutting them up more than is necessary. The Quick Fit Hose Kit provides a means of installing any Quiet-One kickspace heater without having to cut out an access panel in the bottom of the cabinet; it makes Quiet-One kickspace units easier to install as all solder work can be done and all tube connections can be made before the installer slides the Quiet-One into its final resting place under the cabinet; and imagine that, in the unlikely event that service is required, the installer can now pull the kickspace out into the middle of the floor rather than climb into the cabinet.

Each fully packaged kit includes 8' of Watts Radiant synthetic hose with DIN standard oxygen barrier, 3/8" radiant underfloor tubing; four 3/8" barb x 1/2" sweat tees, four 3/8" self tite clamps, and one tube of barb tite glue.

Grilles

Several overlay grilles and replacement grilles are available to enable the contractor's customer to readily match the decor of their house.

All kickspace heater models have grilles available in brown, white, chrome and gold. If other colors are required, the white grille can be painted on site to match any decorator's taste.

MODEL	DESCRIPTION	PART #	FITS THIS KICKSPACE
OLG1-B	Brown Overlay	S10030	KS2004
OLG1-W	White Overlay	S10031	KS2004
